

Atividade 3- RELATÓRIO:

- Deve ser implementada a funcionalidade de **venderProduto** na tela de listagem – já há um botão para isso, mas ele ainda não está funcionando.
- Operação de **venderProduto()** em **ProdutosDAO** – a função deve atualizar o *status* de um produto para “Vendido”.

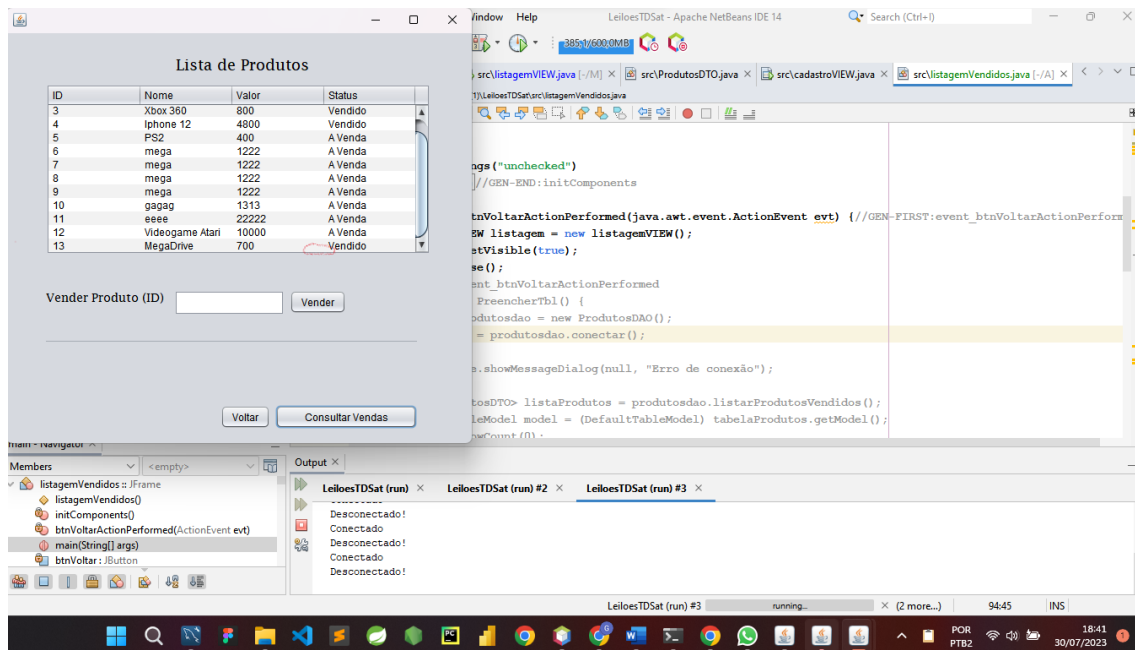

The screenshot shows the MySQL Workbench interface. The SQL editor contains the following query:

```
41
42 --
43 -- AUTO_INCREMENT de tabela 'produtos'
44 --
45 • ALTER TABLE `produtos`
46   MODIFY `id` bigint(20) UNSIGNED NOT NULL AUTO_INCREMENT, AUTO_INCREMENT=6;
47 • COMMIT;
48 • select* from produtos;
49
```

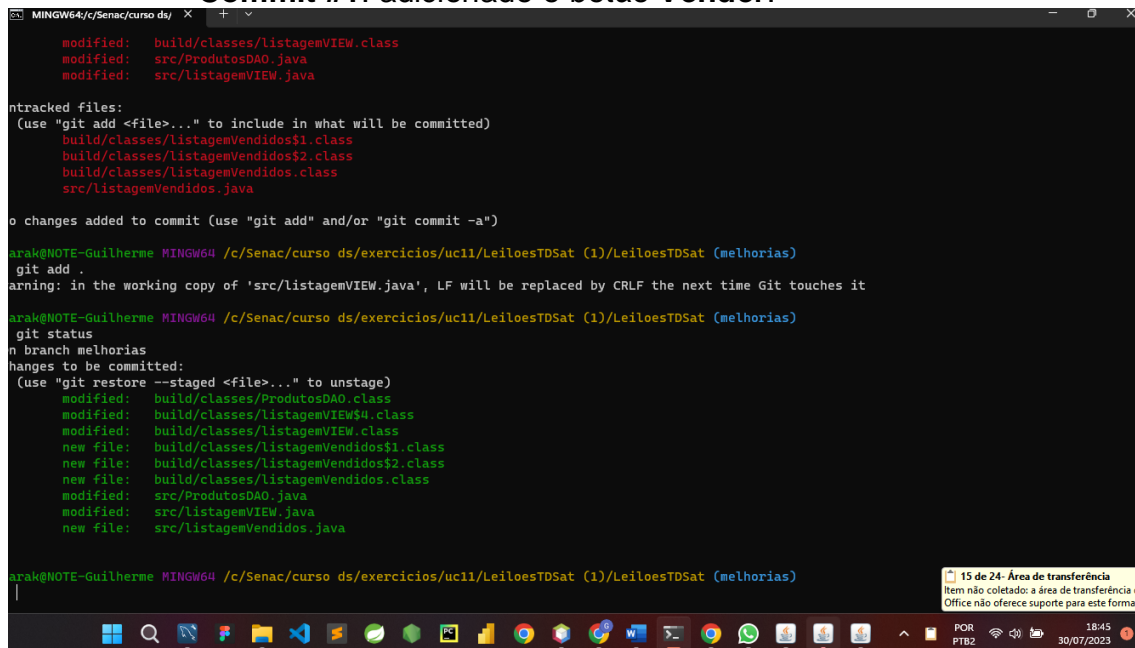

The Results Grid displays the following data:

id	nome	valor	status
2	PS4	1500	Vendido
3	Xbox 360	800	Vendido
4	Iphone 12	4800	Vendido
5	PS2	400	A Venda
6	mega	1222	A Venda
7	mega	1222	A Venda
8	mega	1222	A Venda
9	mega	1222	A Venda
10	gagag	1313	A Venda
11	eeee	22222	A Venda
12	Videogame Atari	10000	A Venda
13	MegaDrive	700	A Venda

The bottom status bar shows the current object is 'produtos 2'.

- **Commit #1: adicionado o botão Vender.**

```

gdenes74 commented 3 minutes ago

Criação de 3 commits, que serão feito Merge com a branch master.

gdenes74 added 3 commits 1 hour ago

- adicionado o botão Vender
- Criando a tela de Vendas
- Filtro para listar apenas itens vendidos

gdenes74 commented 1 minute ago

Feito 3 commits com a branch "melhorias" com sucesso.

E por fim, fazendo o git check out para master e depois o git pull, trazendo as modificações para o local.
